

Mobil Pegasus 1005 helps Argentinian oil and gas producer enhance equipment reliability*

Energy lives here™

Gas compression, power generation and pump equipment | Oil and gas producer | Chubut, Argentina

Situation

An Argentinian oil and gas producer operates more than 300 pieces of equipment, including gas compression, power generation and pump equipment from Waukesha, Caterpillar, Guasco, Ariel and Frick. With logistics, planned maintenance, and environmental protection key components of its business, the company approached ExxonMobil engineers for a lubricant solution capable of enhancing equipment reliability and increasing productivity.

Recommendation

Using ExxonMobil's **Planned Engineering Services**, the company worked with ExxonMobil engineers to identify mutual goals, which included upgrading to **Mobil Pegasus™ 1005** natural gas engine oil, surveying lubrication points and lubricant recommendations. ExxonMobil engineers also recommended implementing **Mobil ServSM Lubricant Analysis** to monitor the condition of the in-service equipment and lubricants. Robust distribution and logistics were also put into place to supply more than 200 lubricant storage points throughout the oil and gas producer's network.

Benefit

Mobil Pegasus 1005 natural gas engine oil has helped this oil and gas producer extend oil drain intervals, reduce maintenance downtime, and lower oil consumption to generate a company-estimated annual savings of US \$350,000.

Impact

After following the recommendations of ExxonMobil engineers, the company reported fewer unplanned shutdowns, increased runtime between overhauls, and a decrease in oil, filter and spare parts consumption. In addition, upgrading to **Mobil Pegasus 1005** natural gas engine oil has helped the company double oil drain intervals, reduce lubricant purchases, and lower maintenance expenses.
